

Please to do not limit the Indiana Telephone Privacy act. It has been very effective in our home allowing us to regain quality time and privacy without interruption. Before we signed up for the Telephone Privacy Act we would receive 5-6 calls per day and now we receive less than 3 per week. You really must try to imagine what it would be like to have every conversation in your home interrupted by a stranger; that is what it was like for us before the Attorney General implemented the Telephone Privacy Act. Again, please don't limit it.
